1. Introduction

◆ What is Azuki Coin?

Azuki Coin is more than just a cryptocurrency — it's a symbol of a self-built community committed to shaping the future.

What began as a meme has evolved into a movement powered by innovation, transparency, and collective participation.

Our mission is simple: to provide equal access to the financial opportunities of tomorrow — free from bias, borders, or privilege.

◆ Why Azuki Coin?

- Because transparency, simplicity, and community involvement are at the heart of this project.
 - Because by combining AI technology with near-zero fees, Azuki brings the future into the present.
 - Because we believe that building the future should be a right for all — not just for crypto whales.
-

Azuki EX

In a time when the crypto world is overwhelmed by technical complexity and high fees, **Azuki enters with a clear mission:**

To build a next-generation decentralized exchange (DEX) — powered by artificial intelligence and offering near-zero transaction costs.

Azuki EX is more than just a trading platform.

Through advanced AI, it not only analyzes trading patterns but also protects user assets from malicious threats.

It creates a safe, intelligent environment where every investor can feel confident and secure.

Azuki EX is:

- Simple for newcomers
 - Powerful for professional traders
 - Fair for everyone
-

Vision for the Future

Let's imagine the near future...

The year is **2030**.

You've invested in Azuki Coin — not just in a token, but in a smart asset, in an idea, in a shared future.

As a stakeholder, you now receive **monthly passive income** from transaction fees on Azuki EX.

Azuki Coin has risen to become one of the **top 10 global cryptocurrencies**, claiming a strong position in the market.

A simple choice, a different future.

 **The choice is yours.**

Opportunities don't wait.

Welcome to Our Community

At Azuki Coin, we laugh together, build together, and rise together.

Azuki Coin — a digital asset for everyone | Powered by AI

Roadmap

2. Key Objectives

- Launch a decentralized exchange (DEX) with near-zero transaction fees
 - Develop a governance token for the DEX in later phases
 - Build an active community across major social platforms
 - Utilize artificial intelligence to optimize DEX performance and operations
-

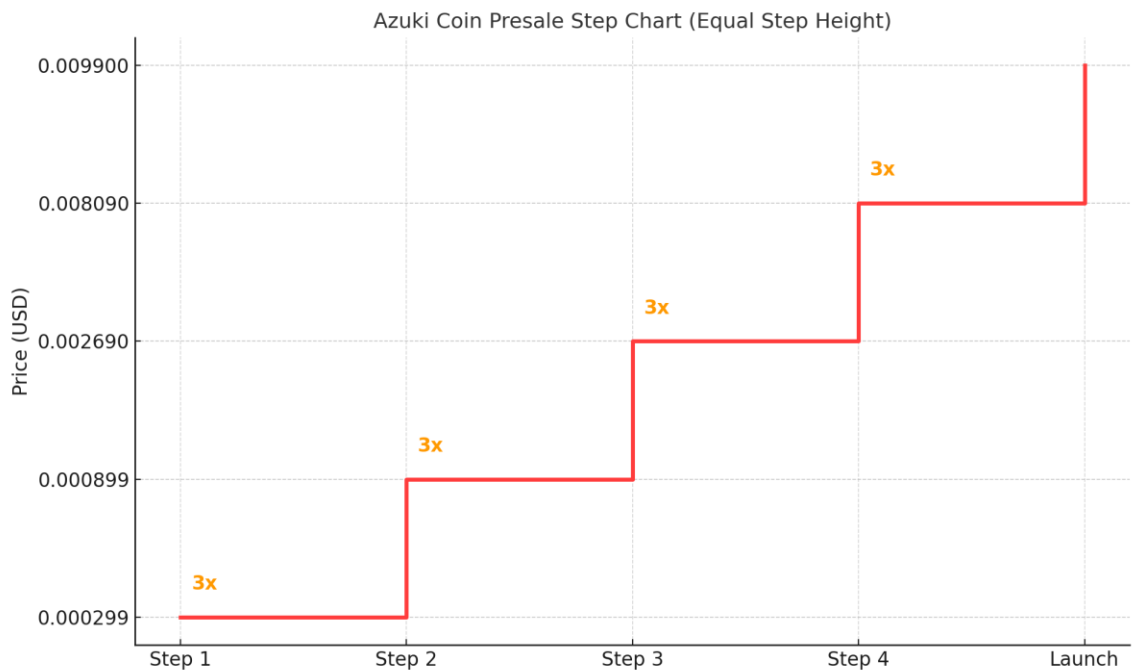

3. Token Presale

Allocation & Discounts

- **Presale Allocation:** 40% (400,000,000 tokens)
- **Structure:** 4 progressive phases, each priced 3× higher than the previous
- **Start Date:** May 25, 2025
- **Phase Duration:** 12 days per phase
- **Token Unlock:** 10% released every 10 days
- **Important:** Tokens will be deposited just **one day before each unlock window**

Tiered Discount Structure:

- Investments between **0.5 SOL to 2 SOL**: No discount (based on current presale price)
- Investments between **2 SOL to 5 SOL**: 15% bonus (calculated on invested amount at presale rate)
- Investments **above 5 SOL**: 25% bonus (calculated on invested amount at presale rate)

◆ 4. Staking Options

- **1-Month Staking:** 5% fixed return
 - **3-Month Staking:** 27% fixed return
-

Launching

◆ 2025

- **Q2:**
 - Launch of Airdrop & Presale
 - Initial DEX Listings on **Raydium** and **Jupiter**
 - **Q3:**
 - Activation of Staking System
 - Expansion of Media & Social Media Campaigns
 - **Q4:**
 - Preparation for Listing on Centralized Exchanges (CEX)
-

◆ 2026

- **Q1:**
 - Start of MVP Development for Azuki Exchange
- **Q2:**
 - Listing on CEX
 - Initial Development of Governance Token
- **Q3:**
 - Launch of Beta Version of Azuki Exchange
 - Listing on Top-Tier CEXs
- **Q4:**
 - Release of the Final Version of Azuki Exchange

◆ 2027

- **Q1:**
 - Start of Passive Income Distribution from Exchange Revenue to Token Holders
-

Tokenomics

◆ Total Supply

1,000,000,000 AZUKI

Allocation	Percentage
Presale	40%
Marketing & Promotion	15%
Development & Infrastructure	20%
Liquidity	10%
Referral Rewards	5%
Reserves & Airdrops	10%

Burning Mechanism

-  For every **2x price increase**, **10 million AZUKI** will be burned.

- 🕒 If the **presale ends early**, unsold tokens will be burned and further sales will be stopped.
 - ❌ **Unused referral rewards** will be permanently burned.
-

🔧 Technical Distribution

- 🔒 **No Token Lock Function in Smart Contracts**
In many projects, a "lock" function is added to the smart contract to restrict token withdrawals from specific wallet addresses. While this can help manage sell pressure, it often reduces transparency and security for investors.
- 🔒 In Azuki Coin, **we've intentionally avoided the token lock function**. Instead, we offer a **transparent and user-centric alternative**:
 - Upon joining the Azuki community through presale, each investor receives a **dedicated user dashboard**.
 - After connecting their wallet to the official website, users can view:
 - Total purchased tokens
 - Referral code & rewards
 - Claimable token balance
 - Tokens will be **unlocked and claimable one day before the official release**, and users will be able to **transfer them freely** to their personal wallets.

📣 Marketing

The **Azuki marketing team** employs a **flexible and adaptive strategy**, adjusting promotional activities based on the real-time needs and growth phase of the project.

Due to this dynamic approach, we currently do not publish a fixed long-term plan.

However, in the spirit of transparency, **marketing reports and performance data may be shared with the community in the future**, whenever feasible.

🎁 Airdrop Campaign

💰 **Reward:** 5,000 Azuki Coins

Participation Requirements:

On Twitter (X)

-  Follow our official account
-  Like &  Retweet the airdrop post
-  Tag **5 friends** under the post

On Telegram

-  Join our **official channel**
-  Join our **community group**
-  React and leave a **comment**

This campaign is designed to **reward early supporters** and help grow a strong, engaged community.
